

Dear Parents/Guardians,

Would you like to earn \$100? It's very simple! We are conducting a Human Papillomavirus (HPV) vaccination study with the goal of testing decision making tools to help improve knowledge, communication, and shared decision-making on the HPV vaccination for 11-14 year-old girls, their parents, and clinicians. We want to know your thoughts on HPV vaccination and the type of content that would be beneficial for you, your family, and community. This is a research study to help the state of New Mexico in making well informed decisions regarding HPV vaccination.

If you are interested in participating, this study will involve:

- Allowing access to your daughter's HPV vaccine status (only her HPV vaccine status will be accessed and no other information will be collected);
- Three surveys: enrolling in the study and completing an online survey right away, another one in 3 months, and one more in 9 months. Each survey will take about 30 minutes
- You may be asked to go through a project website as part of the study, or receive other information about HPV vaccination.

Part 1: Enrollment and 1st Survey	\$25
Part 2: 2nd Survey (3-month follow-up)	\$35
Part 3: 3rd Survey (9-month follow-up)	\$40
Total:	\$100

You do not have to be in this study, your decision to be in any study is totally voluntary.

If you feel you understand the study and would like to participate, please navigate on the Internet to:
www.HPVResearch.org

If you have questions prior to participating, please contact:
Randall Starling, 505-925-2318 or starling@unm.edu

Principal Investigator: Gill Woodall
Study Title: Engaging Patients and Providers in Collaborative Communication on HPV Vaccination (EP-PIC-HPV)
